

VIGO
VENTURES

*Shedding light on the future
by investing in photonics*

MANTRA

To focus on global progress with photonics

Photonics - the science of creating, manipulating, transmitting and detecting light that is literally everywhere, from smartphone displays to fibre-optic broadband to energy-saving LED lights to the laser surgery that saves our life. As light particles (known as photons) replace electrons in many of our most important technologies, innovations already in the pipeline will improve healthcare, grow food, save energy, cut pollution, expand connectivity, transform manufacturing and usher in a new era of mobility. - Europe's Age of Light!, Photonics21.

VIGO
VENTURES

EARLY STAGE PHOTONIC INVESTOR

VIGO
VENTURES

INTRODUCTION

We are an early-stage investor (pre-series A) for photonic and deep tech companies that brings hands-on business approach and possible follow-on investment up to €10mln from our investment group.

We create growth opportunities for existing market segments and with our deep tech focus, create new ones. We invest across Europe, USA and Canada with tickets up to 1,5 mln €.

We are drawn to teams determined to scale globally.

VIGO VENTURES INVESTMENT GROUP

VIGO Photonics

has gone the full way as projects that we are looking for – from the prototype to the world-class technology leader. The projects in which we invest, will have access to technological and commercial resources, contacts and experience in the commercialization of hardware projects.

- Business support (sharing business contacts, access to distribution channels),
- Potential joint commercial and grant projects
- Access to photonic experts
- Knowledge of the industry standards and supply chain

Warsaw Equity Group

one of the oldest Polish privately held investment companies with over 20 years of history and an entrepreneurial DNA. Co-creators of the success of multimillion dollar-companies. The projects in which we invest, will have access to the business network and experience of WEG.

- Access to the network of experts and the WEG ecosystem (HR, PR),
- Sharing knowledge and experience of working with companies at a later stage of development,
- Partners for growth (organization, sales)

INVESTMENT CRITERIA

Financing

- Up to € 1,5 mln (with follow-on)

Technology

- Outstanding, scalable technology that **solves an identified, existing problem** or changes the status quo.
- Defined path of **technology development** and reaching the **commercialization stage**.
- The technology has a **platform approach**, so it can ultimately solve problems for several segments.

Focus

- **Photonics**; B2B , sector agnostic, HW or HW+SW

Stage

- Developed technology (**demonstrator / prototype**) at the level of min. TRL4/5 – preferred projects with developed products.
- Technology development path converging with a specific exit path, **addressing the requirements of potential acquirers**

VIGO VENTURES - PHOTONIC INVESTOR - FOCUS

**Photonics is growing to become a trillion-dollar market in 2026.
Our portfolio companies are already in line with identified trends.**

Shedding light on the future by solving global Grand Challenges with photonics

PORTFOLIO

I. 
Fluence proprietary all-fiber femtosecond lasers for industrial, medical and R&D use.

II. 
QustomDot on-chip grade and ROHS-compliant quantum dots.

III. 
KSM Vision proprietary smart machine vision systems for industrial in-line quality control.

IV. 
Deep Detection multi-spectral X-ray cameras, with deep learning capabilities.

V. 
SpexAI hyperspectral technology unlocking insights on chemical composition and plant health for controlled-environment and greenhouse growers.

VI.  **PHOTON IP** making advanced optical chips by eliminating trade-offs in photonic integration.

VII.  **ChipCraft** the custom silicon design company (Analog & Digital). IP core provider. From user-spec to TapeOut – one-shop service.

VIII. 
Quantune Technologies is developing the first low-cost miniaturized quantum cascade laser (QCL) spectrometer for industrial and biomedical applications.

IX. **FEMTUM** provider of mid-infrared pulsed fiber lasers, for scientific, medical and industrial use.
